

Dangerous goods must be handled by an expert

We safely handle substances or dangerous goods that your company must ship to Latin America. Our procedures were designed based on the IATA Dangerous Goods Manual.

We offer a product with the following characteristics:

- Trained personnel
- Storage in specific areas
- Priority over General Cargo
- In addition to our commercial flights network, we offer you the opportunity to move your cargo in our freighter fleet, ensuring greater capacity and variety in the types of dangerous goods accepted

People who understand your business
